RWANDA RENTALS

Product Features & Descriptions

Complete feature catalogue

This document lists the app's features and briefly describes what each feature does.

A. Account & Profiles

1. Account Registration and Login

Users can create an account and sign in using the supported verification method, initially phone OTP, with email support as configured.

2. User Profiles

Users can manage their name, profile photo, verified contact details, and basic account information.

3. Multiple User Roles

One account can act as a renter, landlord, property manager, or agency team member, with the relevant tools shown for each role.

4. Account and Security Settings

Users can manage account details, sessions, notification preferences, and account-closure or data-request options.

B. Property Listings

5. Create and Manage Property Listings

Landlords can create, edit, preview, publish, pause, and mark listings unavailable or rented.

6. Structured Property Details

Each listing can include property type, monthly rent, deposit, bedrooms, bathrooms, size, furnishing, amenities, rules, rental terms, and availability.

7. Property Photos and Videos

Landlords can upload multiple property photos and videos, select a cover image, and arrange the media shown to renters.

8. Listing Status

Listings show clear states such as draft, pending review, published, paused, unavailable, rented, or rejected.

9. Availability Confirmation

Landlords can confirm whether a property is still available; the app can show when availability was last confirmed.

C. Search & Discovery

10. Smart Search

Renters can search by location, property type, price, bedrooms, amenities, rental duration, and other supported requirements.

11. Advanced Filters and Sorting

Renters can combine filters and sort results by price, newest listings, best match, or recently confirmed availability.

12. List and Map View

Renters can switch between listing cards and a map showing approximate property locations.

13. Nearby Places

Property pages can show nearby schools, universities, hospitals, supermarkets, restaurants, transport, banks, gyms, and other useful places.

14. AI Natural-Language Search

Users can describe what they need in everyday language, and the app converts the request into search criteria against actual listings.

15. AI Property Matching

The app can rank listings using the renter's stated budget, location, room needs, amenities, and rental preferences.

16. AI Listing Questions and Comparison

Users can ask questions about a listing or compare selected properties. Answers must use available listing information and clearly identify missing details.

17. Favorites

Renters can save and remove properties from a single favorites list and see when a saved listing changes or becomes unavailable.

18. Saved Searches and Alerts

Renters can save search criteria and receive alerts when matching properties appear or important listing details change.

19. Property Comparison

Renters can compare two to four properties side by side, including price, location, rooms, amenities, rental terms, availability, and verification indicators.

D. Trust, Verification & Safety

20. Landlord Verification

Landlords complete the required checks before their listings can be published. The platform records the result and the checks performed.

21. Property Verification

The platform checks that a property exists and that the advertiser is authorized to list it, with additional checks introduced as the service develops.

22. Specific Verification Badges

Badges explain what was checked, such as phone, identity, listing authorization, property existence, or availability. A badge is not a guarantee against all risk.

23. Report a Listing or User

Users can report fake properties, scams, misleading details, incorrect prices, duplicate listings, unauthorized advertisers, harassment, or other concerns.

24. Moderation and Safety Review

Authorized staff can review reports, request corrections, pause or remove listings, restrict accounts, record decisions, and handle appeals where appropriate.

25. Rental Safety Guidance

The app provides practical guidance on verification badges, suspicious requests, payments, privacy, and reporting unsafe behavior.

E. In-App Communication

26. In-App Chat

Renters can message landlords or authorized agents directly from a listing without public phone numbers or email addresses.

27. Chat Attachments

Where enabled, users can share relevant photos or short videos in a conversation to ask questions or explain a property issue.

28. Conversation Management

Users can view their inbox and conversation history, receive message alerts, and mute, archive, block, or report conversations.

29. System Messages

The app can display relevant booking, verification, and payment updates inside the associated conversation.

30. Viewing Arrangements Through Chat

Renters and landlords can discuss and arrange property viewings in chat. There is no separate viewing calendar or scheduling feature.

F. Booking & Rental Requests

31. Instant Book

When a landlord enables Instant Book, an eligible renter can book directly according to the listing's configured rules.

32. Request to Book

When a landlord enables Request to Book, the renter submits a request and the landlord accepts or declines it.

33. Booking Status Tracking

Users can see whether a booking is requested, accepted, awaiting required steps, confirmed, rejected, cancelled, expired, completed, or disputed.

34. Minimal Rental Application

The booking process asks for only the information needed. If more information is required, the landlord can request limited additional details.

35. Address Privacy

Before the required booking/payment condition is met, listings show only the district or neighborhood and an approximate map area. The exact address and pin remain private.

36. Booking Rules and Cancellation

The platform applies defined rules for acceptance, expiry, duplicate requests, cancellation, and any remaining steps required to confirm a booking.

G. Payments & Rental Management

37. In-App Payments

The platform is designed to support eligible booking payments, deposits, first month's rent, recurring rent, permitted fees, refunds, and landlord payouts in later phases.

38. Payment History and Receipts

Users can view relevant transaction statuses, amounts, dates, provider references, and receipts without the platform storing payment PINs or authentication secrets.

39. Platform Transaction Fee

The business model may apply an approximately 1% fee to eligible in-app transactions, subject to final terms and provider costs.

40. Rental Records

For rentals originating through Rwanda Rentals, the platform can maintain key dates, agreed terms, participants, and rental status.

41. Rental Agreements and Documents

Later versions can securely store rental agreements and related documents, with controlled access and a record of relevant versions and acknowledgements.

42. Rental Timeline and Reminders

The platform can track move-in, rental dates, renewal, move-out, and other important events for rentals managed through the app.

43. Maintenance Through Chat

Tenants can report maintenance problems to the landlord in chat with a description and, where supported, a photo or video up to one minute.

H. Reviews & Reputation

44. Tenant Reviews of Property and Landlord

After a completed rental, a tenant can rate and review the property and landlord or property manager.

45. Landlord Reviews of Tenant

After a completed rental, a landlord can review the tenant under the platform's review rules.

46. Review Moderation

Users can report abusive or misleading reviews; the platform can prevent duplicate reviews and handle eligible review disputes.

I. Notifications & Support

47. Notifications

Users can receive relevant alerts for new messages, booking changes, saved-property updates, verification outcomes, payment events, and support responses.

48. Notification Preferences

Users can control optional alerts and separate service-related messages from optional promotional communications.

49. Help Center

The app provides guidance on accounts, listings, search, verification, bookings, safety, payments, and privacy.

50. Customer Support

Users can contact support about account problems, suspicious listings, booking issues, payment problems, or other platform concerns and track case status.

J. Landlord & Agency Tools

51. Landlord Dashboard

Landlords can manage listings, verification tasks, messages, booking requests, availability, and relevant rental activity from one place.

52. Landlord and Property Manager Profiles

Profiles can show a display name, organization, relevant verification badges, active listings, eligible reviews, and response indicators when enough data exists.

53. Agency Accounts

Agencies can manage an organization profile and property portfolio, with support for multiple staff members and role-based permissions.

54. Team Roles and Property Assignments

Agency owners can assign staff to listing management, messaging, booking, finance, or other approved tasks, with access limited to their responsibilities.

55. Listing and Performance Insights

Landlords and agencies can later view useful metrics such as listing views, inquiries, response performance, and booking activity.

K. Administration & Platform Operations

56. Admin Dashboard

Authorized staff can manage users, listings, verification cases, reports, bookings, support cases, reviews, and platform settings.

57. Verification Review Console

Reviewers can inspect submitted evidence, record decisions and reasons, request corrections, and track verification status.

58. Content and Account Moderation

Authorized staff can investigate abuse, manage reported content, apply proportionate restrictions, and maintain an audit history.

59. Payment and Dispute Operations

When payments are enabled, authorized staff can review transaction states, reconcile provider records, and handle permitted refunds or disputes.

60. Platform Configuration

Administrators can maintain supported locations, property types, amenities, listing rules, fees, and feature settings.

L. Privacy, Security & Platform Quality

61. Privacy and Data Controls

Users can find privacy information and request access to, correction of, or deletion of their personal data, subject to applicable retention requirements.

62. Secure Data Access

Private conversations, bookings, identity evidence, exact addresses, and financial records are accessible only to authorized users and staff.

63. Account and Staff Security

The platform supports protected sessions, role-based access, stronger authentication for privileged staff, and records of sensitive administrative actions.

64. Data Retention and Deletion

Different categories of information follow defined retention and deletion rules, including how account closure and backups are handled.

65. Service Reliability and Error Handling

The app provides clear loading, empty, error, retry, and upload states, while backend checks protect important actions such as booking and payment.

66. Privacy-Conscious Analytics

The platform can measure listing quality, searches, inquiries, booking conversion, and abuse indicators while minimizing unnecessary tracking and avoiding advertising trackers at launch.

M. Business Features

67. Featured Listings

Landlords can pay to give a listing additional visibility. Paid placement must be clearly labeled and must not imply extra verification.

68. Landlord Subscriptions

Future subscription plans can offer additional listing capacity or management tools for landlords and agencies.

69. Additional Revenue Options

Later possibilities include qualified-lead fees, advanced property-management subscriptions, and commissions on approved maintenance-related services.

Feature descriptions only. Availability and release timing may differ by implementation phase.
