Rwanda Rentals — Third-Party Services

Main app features that may require an external service

Feature	Third-party service needed	Examples
Phone OTP / SMS login	SMS provider	Pindo, Twilio
Email verification and emails	Email provider	Resend, SendGrid
Maps and property locations	Map provider	Google Maps, Mapbox
Property photos and videos	Storage service, if Supabase Storage isn't enough	Supabase Storage, Cloudinary
Push notifications	Push delivery service	Expo Push, Firebase Cloud Messaging (FCM)
Rental payments, deposits and payouts	Payment provider	MTN MoMo, supported banks/payment gateways
AI search and property matching	AI model API	OpenAI API or another provider
Address/place information	Places/geocoding API	Google Places, Mapbox
Analytics and app usage tracking	Analytics provider	PostHog, Firebase Analytics
Crash reports and error monitoring	Monitoring service	Sentry
Customer support chat/ticketing	Support platform, if not built in-house	Intercom, Zendesk
Identity/document verification	Verification provider, if automated verification is needed	A suitable identity-verification vendor
Anti-spam / bot protection	Security service, if needed	Cloudflare Turnstile
App store distribution	App marketplaces	Apple App Store, Google Play

Note: These are examples, not final vendor selections. Some capabilities can be handled by Supabase or built directly into the app, so separate providers may not be necessary. Review privacy, security, cost, and applicable Rwanda data-protection requirements before choosing a provider.
